Сообщ. №

Technical drawing of a stepped cylindrical part. The part has a total height of 120 mm, a top diameter of $\phi 70$, and a bottom diameter of $\phi 50$. A central vertical slot is 50 mm deep. A hole with a diameter of $\phi 12$ is located 12 mm from the top surface. A horizontal slot 12 mm deep is positioned 12 mm from the bottom of the central slot. The part is shown in three views: a front view, a top view, and a side view. The side view shows the stepped profile and the locations of the central and horizontal slots. The top view shows the $\phi 70$ diameter and the $\phi 12$ hole. The front view shows the $\phi 50$ diameter and the 50 mm depth of the central slot.

5-

This technical cross-sectional diagram illustrates a bearing assembly. It features two main components: a top ring and a bottom ring, both depicted in blue. The top ring has a hatched pattern on its outer surface. The bottom ring is marked with a dimension of $\phi 112$. A circular callout labeled 'A' provides a detailed view of the interface between the two rings, showing a stepped profile where they meet. A dashed red line serves as a reference for the outer diameter of the assembly.

B-E

A technical drawing of a circular component. A horizontal dimension line with arrows at both ends spans the width of the circle, labeled '205' below it. A vertical center line passes through the center of the circle. A diagonal line is drawn from the top-left to the bottom-right through the center of the circle.
